

Smart-UPS RT

APC Smart-UPS RT 10000VA 208V

APC Smart-UPS RT, 8000 Watts / 10 kVA,Input 208V / Output 208V, Interface Port DB-9 RS-232, RJ-45 10/100 Base-T, Smart-Slot, Extended runtime model, Rack Height 6 U

Includes: CD with software, Service Manual, Smart UPS signalling RS-232 cable, User Manual, Web/SNMP Management Card

Standard Lead Time: Usually in Stock

Smart-UPS RT Features & Benefits

Availability	
Automatic internal bypass	Supplies utility power to the connected loads in the event of a UPS overload condition or fault.
Scalable runtime	Allows additional run time to be quickly added as needed.
Intelligent Battery Management	Maximizes battery performance, life, and reliability through intelligent, precision charging.
Hot-swappable batteries	Ensures clean, uninterrupted power to protected equipment while batteries are being replaced
Automatic restart of loads after UPS shutdown	Automatically starts up the connected equipment upon the return of utility power.
Temperature- compensated battery charging	Prolongs battery life by regulating the charge voltage according to battery temperature.
Manageability	
Network manageable InfraStruXure Manager Compatible	Provides remote management of the UPS over the network. Enables centralized management via the APC InfraStruXure® Manager.
SmartSlot	Customize UPS capabilities with management cards.
LED status indicators	Quickly understand unit and power status with visual indicators.
Serial Connectivity	Provides management of the UPS via a serial port.
Adaptability	
Plug-and-Play externa batteries	l Ensures clean, uninterrupted power to the loads when adding extra runtime to the UPS.
Rack/Tower convertible	Protects the initial investment in the UPS when migrating from tower to rack-mount environment.
Flash-upgradeable firmware	Easy implementation of new firmware upgrades.
Serviceability	
User-replaceable batteries	Increases availability by allowing a trained user to perform upgrades and replacements of the batteries reducing Mean Time to Repair (MTTR)
Automatic self-test	Periodic battery self-test ensures early detection of a battery that needs to be replaced.
Predictive failure notification	Provides early-warning fault analysis ensuring proactive component replacement.
Disconnected battery notification	Warns when a battery is not available to provide backup power.
Audible Alarms	Actively let you know if the unit is on battery, if the battery is low or if there is an overload condition.

Frequency and voltage Gives higher application availability by correcting poor frequency and regulation voltage conditions without using the battery.

Protection

Power conditioning	Protects connected loads from surges, spikes, lightning, and other power disturbances.
Input power factor correction	Minimizes installation costs by enabling the use of smaller generators and cabling.
Generator Compatible	Ensures clean, uninterrupted power to the loads in the event of an extended power outage
Cold-start capable	Provides temporary battery power when the utility power is out.
Resettable circuit breakers	Enables a quick recovery from overload events.
Safety-agency approved	Ensures the product has been tested and approved to work safely with the connected service provider equipment and within the specified environment. UL, FCC, CE, C-Tick approvals.

Output

Output Power Capacity 8000 Watts / 10 kVA

Max Configurable Power 8000 Watts / 10 kVA

Nominal Output Voltage 208V

Output Voltage Note Configurable for 208 or 240 nominal output voltage

Efficiency at Full Load 92%

Output Voltage Distortion Less than 3%

Output Frequency (sync to mains) 50/60 Hz +/- 3 Hz user adjustable +/- 0.1

Crest Factor 3:1

Waveform Type Sine wave

Output Connections (1) Hard Wire 3-wire (2PH + G)

(2) NEMA L6-20R

(2) NEMA L6-30R

Bypass Internal Bypass (Automatic and Manual)

Input

Nominal Input Voltage 208V

Input Frequency 50/60 Hz +/- 5 Hz (auto sensing)

Input Connections Hard Wire 3-wire (2PH + G)

Input voltage range for main

operations

160 - 280V

Other Input Voltages 240

Batteries & Runtime

Battery Type Maintenance-free sealed Lead-Acid battery with suspended electrolyte: leakproof

Included Battery Modules 4

Typical recharge time 2.20 hour(s)

Replacement Battery RBC44

RBCTM Quantity 2

Typical Backup Time

at Half Load

14.9 minutes (4000 Watts)

Typical Backup Time

at Full Load

4.8 minutes (8000 Watts)

Runtime Chart Smart-UPS RT

Audible noise at 1 meter from

surface of unit

55.00 dBA

Online Thermal Dissipation 2216.00 BTU/hr

Conformance

Regulatory Approvals CSA,FCC Part 15 Class A,UL 1778

Standard Warranty 2 years repair or replace

ROHS/WEEE Compliance RoHS 7b Exemption

^{**}The time to recharge to 90% of full battery capacity following a discharge to shutdown using a load rated for 1/2 the full load rating of the UPS.

Hardwiring

Attention: Wiring must be performed by a qualified electrician.

- 1. Install a utility circuit breaker in accordance with local electrical codes (see tables below) for input wiring only.
- 2. Switch the UPS input circuit breaker (see A) and utility circuit breakers OFF.
- 3. Remove the access panel (see **B**).
- 4. Remove circular knockouts.
- 5. Run wires through access panel to terminal blocks. Wire to ground block first. **Adhere to all national and local electrical codes.** (See tables and graphics.)
- 6. Use appropriate glands to achieve strain-relief on the hardwired input and output power cables.

XLT, XLJ, AND XLTW MODELS		
Input Connection Output Connection (optional)		
Wire to L1, L2, and .	Wire to L1A, L2A, and $\frac{\bot}{=}$.	

System	Wiring	Voltage	Current Full Load (Nominal)	External Input Circuit Breaker (typical)	Wire Size (typical)
SURT7500XLJ, SURT7500XLT, SURT7500XLTW	Input & Output	200/208/220V	40 amps XLTW- 38 amps	50 amps / 2-pole for Input Wiring Only	#8AWG/ 10mm ²
SURT10000XLJ, SURT10000XLT, SURT10000XLTW	Input & Output	200/208/220V	54 amps XLTW-50 amps	70 amps / 2-pole for Input Wiring only	#6AWG/ 16mm ²

XLI MODELS			
Input Connections	Output Connection (optional)		
Single-Phase: Wire to L1, N, and .	Wire to L1A, N1, and $\frac{\bot}{=}$.		
Three-Phase: Wire to L1, L2, L3, N, and =.			

System	Wiring	Number of Phases	Voltage	Current Full Load (Nominal)	External Input Circuit Breaker (typical)	Wire Size (typical)
SURT7500XLI	Input	1	220/230/240V	38 amps	50 amps / 2-pole	10mm ²
	Input	3+ Neutral	380/400/415V	14 amps / phase when online, 38 amps on L1 in bypass	50 amps / 4-pole	10mm ²
	Output	1	220/230/240V	38 amps	(not required)	10mm ²
SURT10000XLI	Input	1	220/230/240V	50 amps	63 amps / 2-pole	16mm ²
	Input	3+ Neutral	380/400/415V	18 amps / phase when online, 50 amps on L1 in bypass	63 amps / 4-pole	16mm ²
ı	Output	1	220/230/240V	50 amps	(not required)	16mm ²
