DET2 - Series

Digital Time Delay Relays

Wide Timing Range

High Timing Accuracy

Red LED Display

Standard 8 Pin Octal Termination

2 Type C (SPDT)

SPECIFICATIONS

Type	On-Delay Digital
Timing Range	0.02 - 9999 Seconds 0.02 - 9999 Minutes 0.02 - 99 Hours 99 Minutes
Timing Error	0.05% + 50 Milliseconds
Contact Type	2 SPDT
Unit Weight	175 Grams

COIL AND CONTACT RATING

Contact Arrangement	2C
Resistive Load Cos. $\Phi = 1$	5A @ 250 VAC
Nominal Voltage	220 VAC
Power Consumption	5VA
Temperature Rise (Nominal Voltage)	25°C

Operating Instructions

Revised 8/24/2004

Delay Timer Set Point

Press the Manual Set Point Buttons to set the amount of delay time. The first four locations indicate the numerical value of the delay. The last segment is used to set the time value in hours, minutes, seconds and fractions of seconds. The chart details the various weights assigned to each option. Press the (+) plus button to advance the time or the (-) minus button to remove time.

Current Delay Time

The Current Delay Time display shows the amount of time elapsed since the application of power to the device. Red LED's will count up from zero to the set point.
