### Type N connector series

#### Features & Benefits | Applications | Standard Specs | Corrugated Specs | Assembly Instructions

Named after Paul Neill of Bell Labs after being developed in the 1940's, the Type N offered the first true microwave performance. The Type N connector was developed to satisfy the need for a durable, weatherproof, medium-size RF connector with consistent performance through 11 GHz.

There are two families of Type N connectors: Standard N (coaxial cable) and Corrugated N (helical and annular cable). Their primary applications are the termination of medium to miniature size coaxial cable, including RG-8, RG-58, RG-141, and RG-225. RF coaxial connectors are the most important element in the cable system. Corrugated copper coaxial cables have the

Shopping Cart

potential to deliver all the performance your system requires, but they are often limited by the performance of the connectors.

Intermodulation distortion, a major concern in today's communications systems, is consistently low with corrugated cable connectors. Typical performance is -125 dBm (-168 dBdc). In-house IMD measurement capability gives Amphenol the unique ability to understand the effects of connector design elements on IMD generation and to design the best performing connectors in the industry. Selfflaring designs are easily attached with standard hand tools in the field, and are highly resistant to pull off and twist off. All corrugated cable connectors are optimally matched to their cables for low VSWR and insertion loss.

#### ACCESSORIES

N Male Cap & Chain

#### **Features & Benefits**

- Accommodates a wide range of medium to miniature-sized RG coaxial cables in a rugged medium-sized design
- Broad line of Military (M39012), Industrial (UG) and Commercial (RFX) grade products available, giving customers choices in weighing cost versus performance benefits
- Meets many customer application demands with plug styles available in straight and right angle and jack styles available in panel mount, bulkhead mount, and receptacle

#### Applications

- Antennas
- Cable assemblies
- Instrumentation
- PCS
- Satcom

- Base stations
- Cellular
- Microwave Radio
- Radar
- Surge Protection
- Broadcast
- Components
- Mil-Aero
- Radios
- WLAN

#### **Type N Standard Specifications**

mpedance	50 Ω		
Frequency Range	0 - 11 GHz		
Voltage Rating	1,500 volts peak		
VSWR	MIL-C-39012 straight connectors: 1.3 max 0-11 GHz MIL-C-39012 right angle connectors: 1.35 max 0-11 GHz		
Dielectric Withstanding Voltage	2,500 volts rms		
Insulation Resistance	5,000 MΩ minimum		
Center Contact Resistance	1.0 mΩ		
Outer Contact Resistance	0.2 mΩ		
RF Leakage	-90 dB minimum at 3 GHz		
Insertion Loss	.15 dB maximum at 10 GHz		

Mating	5/8-24 threaded coupling		
Braid or Jacket Cable Affixment	All crimps: hex braid crimp		
	Clamps: screw-thread nut and braid clamp		
Center Conductor Cable Affixment	Crimp: crimp or solder		
	All others: solder only		
Captivated Contact	All crimps unless specified otherwise		
Cable Retention	Crimps: 60-120 lbs Clamps: 30-70 lbs		
Material			
Male Contacts	Brass, silver or gold plated		
Female Contacts	Phosphorous bronze or beryllium copper, silver or gold plated		
Other Metal Parts	Brass with ASTROplate® finish; M39012 has silver finish		
Insulators	TFE, copolymer of styrene or glass-TFE (hermetic seal)		
Weatherproof Gaskets	Silicone rubber of synthetic rubber		
Crimp Ferrule	Copper		
Environmental			
· · ·	TFE: -65°C to +165°C		
Environmental Temperature Range	TFE: -65°C to +165°C All series N with gaskets are weatherproof		
Environmental Temperature Range Weatherproof			
Environmental Temperature Range Weatherproof Hermetic Seals	All series N with gaskets are weatherproof

Environmental Temperature Range Weatherproof Hermetic Seals Pressurized Shock Vibration	All series N with gaskets are weatherproof Pass helium leak test of 2x10-8 cc/sec Compression seal MIL-STD-202, method 213 MIL-STD-202, method 204, test condition B		
Environmental Temperature Range Weatherproof Hermetic Seals Pressurized Shock Vibration Moisture Resistance Corrosion	All series N with gaskets are weatherproof Pass helium leak test of 2x10-8 cc/sec Compression seal MIL-STD-202, method 213 MIL-STD-202, method 204, test condition B MIL-STD-202, method 106		
Environmental Temperature Range Weatherproof Hermetic Seals Pressurized Shock Vibration Moisture Resistance	All series N with gaskets are weatherproof Pass helium leak test of 2x10-8 cc/sec Compression seal MIL-STD-202, method 213 MIL-STD-202, method 204, test condition B MIL-STD-202, method 106 MIL-STD-202, method 101, test condition B		
Environmental Temperature Range Weatherproof Hermetic Seals Pressurized Shock Vibration Moisture Resistance Corrosion Temperature Cycling	All series N with gaskets are weatherproof Pass helium leak test of 2x10-8 cc/sec Compression seal MIL-STD-202, method 213 MIL-STD-202, method 204, test condition B MIL-STD-202, method 106 MIL-STD-202, method 101, test condition B MIL-STD-202, method 102, test condition C		

Note: These characteristics are typical but may not apply to all connectors.

## Corrugated Type N Specifications

Electrical					
Impedance	50 Ω				
Frequency Range	11.0 GHz				
Return Loss	33 dB (1-2 GHz) 28 dB (2-3 GHz)				
Operating Voltage	Maximum 707 rms				
Dielectric Withstanding Voltage	2,000 vdc				
Insulation Resistance	5,000 MΩ minimum				
Insertion Loss	.05 frequency GHz				
Shielding Effectiveness	Minimum 125 dB				
Peak Power	Maximum 10 kW				
Average Power	Maximum .60 kW				
3rd Order IM Product	Typical -125 dBm (-168 dBc)				
Mechanical					
Mating	MIL-STD-348				
Inner Attachment Method	Solder or captivated				
Outer Attachment Method	Compression				
Assembly Torque	18/22 lb-ft (25/30 N-m)				
Coupling Torque	15.00 lb-in (1.70 N-m)				
Coupling Nut Retention Force	100.00 lbs (444.80 N)				
Connector Durability	500 cycles, 12 cycles/minute				
Material					
Body	Brass, silver plated
