Amphenol® 97 Series Standard Cylindrical Connector

12-022-15

Amphenol

Amphenol® 97 Series Connectors provide the interconnection solution for low cost, general duty applications

Amphenol offers the 97 Series Connector Family - A general duty standard cylindrical connector, MIL-5015 style.

The 97 Series is a widely used connector series for the automotive, robotics, machine tool and welding industries, as well as numerous other commercial applications from heavy equipment to ECG monitoring cables.

Shell components are fabricated from high grade aluminum alloy to provide strength and environmental protection. This family of connectors offers a wide variety of shell styles, contact patterns and accessory options.

The Amphenol® 97 Series design features and benefits:

- Low cost, general duty non-environmental
- Environmental capability with the 417 suffix plus 9767 cable clamp (see page 34)
- Solder or crimp termination
- UL Recognized, CSA Recognized
- Wide selection of shell styles and insert patterns
- Wide selection of connector finishes cadmium or non-cadmium (environmentally friendly zinc alloy)
- · Threaded coupling, hard dielectric inserts
- Solid or split shell construction
- Accessories for both individual wire seal and jacketed cable

RoHS COMPLIANT PRODUCT AVAILABLE – Consult
Amphenol Industrial Operations.

Amphenol® 97 Series Connectors with solder contacts

DESIGN CHARACTERISTICS

- Medium to heavy weight cylindrical
- Durable, field-proven design
- Single key/keyway polarization
- · Threaded coupling, hard dielectric inserts
- Non-rotating contacts
- Operating temperatures from –55°C to +125°C
- Cost effective
- Intermateable and intermountable with existing 97 Series and MIL-5015 connectors
- Underwriters Laboratories approved recognition File E115497
- Canadian Standards Association Certification File LR69183

CUSTOMER OPTIONS

- · Solid or split shell construction
- Six shell styles
- 128 contact arrangements, from 1 to 52 circuits
- · Alternate insert positioning
- High temperature and potting constructions
- Special plating finishes including black and green zinc alloy
- Optional gold plating on MS contacts
- · Thermocouple arrangements available

Connector components are fabricated from high grade aluminum alloy, with a conductive cadmium plate finish and an olive drab chromate after-treatment. Some cable clamps are a zinc alloy with an olive drab/green chromate finish. See how to order page 19 for other finish variations.

Contacts are silver plated with pre-tinned solder cups. Optional gold over silver plating is also available. Inserts for solder style contacts are diallyl-phthalate.

Users should be aware that classes "A" and "B" of MIL-5015 have been cancelled, and these products are no longer qualified.

97 series solder type how to order

Example of part number for solder type connectors is given below.

Amphenol Industrial 97 Series

97 Series Industrial Cylindrical Connectors

Amphenol's 97 Series is the lowest cost, cylindrical interconnect solution utilizing the proven 5015 family connector style. 97 Series offers: six shell options, solid and split, 128 different contact arrangements, 1 to 52 circuits, one of the largest selections of insert patterns on the connector market, crimp, solder, thermocouple and PCB (100 suffix) contacts, all which makes 97 Series one of the most versatile of Amphenol's connector with utilization in many markets.

Applications

- Machine Tool/Factory Automation
 - Power and Cutting Tools
 - o Instrumentation Distribution
 - o Control Panels
 - CNC Milling Machines
- Welding Equipment
 - o Station, Robotic and Portable
 - o Factory Construction
 - o Garage Welders
 - Auxiliary Equipment
 - Spool Guns
 - Wire Feeders
- Motors
 - Servo Motors
 - Motion Control
 - Power Motors
 - Stepper Motors
 - o Encoders
- Mining Equipment
 - o Mining Shovels
 - o Seismic Sensing Equipment
 - o Seismic Geophones
- Robotics
 - o Power and Multi Axis Control Equipment
 - Factory Automation

Semiconductor Equipment

- Automated Assembly and Test Equipment
- o Equipment Specifically for CEM Assembly
- Semiconductor Test Equipment Mfg'ers
- Off Road Vehicles
 - o Concrete Road Building
 - Precision Farm Monitoring Equipment
 - o GPS in Heavy Duty Trucks
- Test & Measurement
 - Temperature Chambers
 - o Vibration Controllers and Shakers
 - RF Amplifiers
 - o Power Supplies
- Medical Equipment
 - o Medical X-Ray/Ultrasound Equipment
 - Blood Analyses
 - o Medical Coaches/Vehicles
 - o ECG Monitoring Cables
- Motion Sensors
 - o Bar Code Scanners
 - o Flame Sensors
 - o Temperature Controls

Key Benefits

- Keyway Polarization
 - Prevents incorrect mating
- Inserts easily removed from shell
 - o Minimizes repair time thus saving money
- Non-Rotating Contacts
 - Increases productivity by ease of soldering
- Solder, Crimp, Thermocouple and PCB contacts
 - o Provides wide range of connector solutions
- Multiple Wire Gauges: 0 to 30 AWG
 - o Flexibility in Design
- Pre-filled Solder Cup
 - Increase productivity by reducing preparation work.

Multiple finishes including RoHS compliant

- O.D. Cadmium, Black Zinc Cobalt, Clear Cadmium, Electroless Nickel and more offer large variety of environmental finishes for any application.
- Alternative Insert Rotations
 - Increase design options within shell size.
- Hard Plastic (Diallyl-Phthalate) Inserts
 - Resists breakage and extends connector life.
- Many Connector Accessories
 - o Cable clamps
 - Gaskets and Protection Caps
 - Cap and Chain Assemblies
