## 50 MHz to 6 GHz High Linear Amplifier

### Data Sheet

#### Description

Avago Technologies's MGA-53543 is a high dynamic range low noise amplifier MMIC housed in a 4-lead SC-70 (SOT-343) surface mount plastic package.

The combination of high linearity, low noise figure and high gain makes the MGA-53543 ideal for cellular/PCS/W-CDMA base stations, Wireless LAN, WLL and other systems in the 50 MHz to 6 GHz frequency range.

MGA-53543 is especially ideal for Cellular/PCS/W-CDMA basestation applications. With high IP3 and low noise figure, the MGA-53543 may be utilized as a driver amplifier in the transmit chain and as a second stage LNA in the receive chain.
