TUTORIAL

GM-FA-10J Gate Monitoring A

- Monitor one or two mechanical safety switches for a contact failure or wiring
- Two redundant output switching channels for connection to control-reliable interrupt circuits
- Auto reset or monitored manual reset
- Designed to meet standards UL991, EN1088, and EN954-1 (Safety Gate)
- 6 amp safety output contacts
- Plug-in terminal blocks
- See Safety Interlock section for both mechanical and magnetic switch selection
