EH Series Audio/Video/Data Panel Mount Connectors

Switchcraft's newest line of connectors, the EH Series, offers a wide range of connectors all within a standard XLR housing. A single panel cut-out allows the end user to mount multiple formats including USB-A, USB-B, Firewire, S-VHS, 3.5mm stereo with normal circuit, MIDI, both 9 pin and 15 pin HD D-sub, plus RCA and BNC feed-thru's. Perfect for systems integration, pro audio, A/V, data, etc. The connectors conveniently mount into standard XLR diagonal hole knockouts, which allows the installer to easily combine the different formats into standard pre-knocked plates or racks without having to custom drill and tap a specific hole for a specific connector. You can also populate your own combination of EH connectors in Switchcraft empty QG rack panels or single and dual gang wall plates.

EHDB9FF

The EH Series by Switchcraft® is a complete line of audio, video, and data connectors built into standard panel-mount XLR housings. Custom combinations of EH Series connectors can be quickly and easily loaded into an empty 19-inch 1RU (1x16), 1.5RU (1x16), or 2RU (2x16) rack pre-punched with tapped 4-40 holes.

Switchcraft's EH Series is the fastest and most versatile way to create a custom panel or wall plate perfectly suited to meet the needs of any studio, broadcast facility, or systems integrator.
