

AX101852 Termination Station

Termination Station

The Belden IBDN Termination Station is an ergonomically designed holder that provides stability to the GigaFlex Module during the termination process. The station has pockets with locking features that steadily hold either MDVO-style or Keystone-style GigaFlex Modules during pair placement and wire termination. Cable retainers on each end of the station will secure and hold cables during the pair placements process. The flat bottom surface will provide the required stability to safely terminate the modules. The tool is made of very durable plastic and its low profile will make it an easy tool to use and carry.

Features & Benefits

- > Ergonomically designed for ease of use and maximum security
- > Locking pockets for MDVO-style and Keystone-style offer maximum stability during termination of GigaFlex Modules
- > Cable retainers to hold cable during pair placement process
- > Made of durable plastic for long-term product performance.

Application

- > GigaFlex Module termination.

Technical Specifications

- > Dimensions (H x W x D): 63.5 x 142 x 17.8 mm (2.5 x 5.6 x 0.7 in.).
- > Material: Fire-retardant plastic, black.

Installation tips

- > Putting the Termination Station flat against the wall right over the Workstation Outlet will minimize cable slack required for termination
- > Marking at the bottom of the pockets indicates orientation of the module. The modules can also be inserted in the opposite orientation (180% rotated).

Packaging

- > Individually packaged in a clear plastic bag
- > Standard shipping carton of 10 units.
