

QUEST's Iconable Multimedia Series Faceplates are designed where station identification is required. This series accepts QUEST's line of Category 3 and higher keystone jacks. They also feature slots to facilitate insertion of icons for color-coding application or department identification. Additionally, each faceplate features clear station labels for station ID. They are offered in 1, 2, 4 and 6 port configurations and in ivory and white colors. They come complete with mounting screws, station labels and clear plastic overlays. The snap-in series of modules are also compatible with the Iconable series as shown for the standard series faceplates on page 6.
