TOOLS THAT WORK AS HARD AS YOU.

New Portasol[®] PSI-100 and PSI-100K

This may be the best professional-quality portable iron in the world.

The Portasol[®] line of cordless, refillable butane gas powered soldering and heating tools is one of the best and most complete anywhere. With the introduction of the PSI-100, there is now a Portasol portable butane soldering tool for every use and budget.

The PSI-100 self-igniting portable butane heat tool can solder, heat shrink, cut rope, as well as perform other open-flame operations. Because it allows antistatic soldering, it is ideal for service technicians in industries such as electronics, avionics, cellular communications, alarm systems, marine, and automotive.

This well-balanced, professional tool has a rugged stainless-steel body and provides up to 125 watts of power. Temperature is fully adjustable up to 1,076°F.

The PSI-100 will run for up to two hours on a single refill. Refueling is quick, and the fuel level is clearly visible through a window on the body of the tool. Other features include an Auto Switch safety shutoff, iron-plated tips, and a built-in filter to reduce the chance of problems caused by contaminated fuel.

The PSI-100K kit includes the iron, sponge, stand, and extra tips in a durable blow molded box.

Portasol® P-1 and P-1K

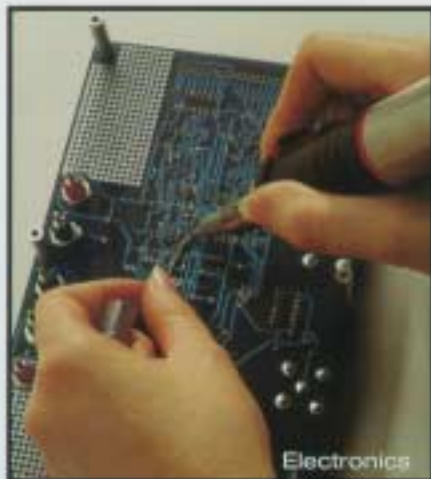

A precision portable iron for craftsmen and professionals.

This portable soldering tool provides up to ninety minutes of continuous use on a single charge of butane lighter fuel. Refilling with standard butane lighter fuel takes less than 20 seconds. Since it requires no cords, batteries or cartridges, the P-1 is great for a wide variety of soldering or desoldering jobs, and goes almost anywhere.

An adjustable temperature control regulates the power (the equivalent of 10-60 watts), quickly heating the tip to 850°F, to melt solder in less than 40 seconds.

The patented head features a catalytic

converter that provides powerful yet safe flameless combustion. A variety of optional and easily interchangeable soldering tips and heat tool accessories convert the P-1 from a soldering iron to a blow torch, hot blower or hot knife. Available soldering tips for the P-1 include 1.0mm (1/32"), 2.4mm (3/32"), 3.2mm (1/8") and 4.8mm (3/16") sizes. A flint-sparked ignition is standard. The P-1K Portasol kit includes the P-1 soldering tool with 10mm iron-plated tip, hot knife, hot blower, blow torch, cleaning sponge and safety stand – all packed neatly in a sturdy plastic case.

Portasol® C1C

The perfect choice for homeowner do-it-yourself repairs.

This homeowner or occasional hobbyist version of our Portasol line of portable butane gas powered tools is a high-quality soldering iron with many features of the professional models.

The C1C still features the catalytic converter for powerful yet flameless combustion, flint-sparked ignition in the cap, safety cut-off switch, easily interchangeable tips and accessories, and easy refilling with standard butane fuel.

There are no cords, batteries, or cartridges, so the Portasol C1C goes anywhere. Accessories include 1/8" chisel tip and 1/8" needle soldering tips, as well as a hot knife tip.
