

SNAP PAC 16-Module Mounting Rack

SNAP-PAC-RCK16

The SNAP-PAC-RCK16 mounts one SNAP PAC **brain** or on-the-rack **controller** and up to 16 analog, digital, serial, and special-purpose SNAP I/O modules. The SNAP-PAC-RCK16 can be DIN-rail or panel mounted.

This rack works with all SNAP I/O modules on the Opto 22 website. Analog, digital, serial, and special-purpose modules can be mixed on the rack and placed in any position. (Some serial and special-purpose modules are limited to a maximum of eight on one rack. See module data sheets for limitations and power requirements.)

If you need Factory Mutual approval, see the SNAP-PAC-RCK16-FM instead.

Other SNAP PAC racks available:

- **SNAP-PAC-RCK4** for 4 modules
- **SNAP-PAC-RCK8** for 8 modules
- **SNAP-PAC-RCK12** for 12 modules

NOTE: This rack replaces part number SNAP-M64. All brains that mount on a SNAP-M64 can also be mounted on this rack.
