## Combo Tester

## Features and Benefits:

- **Dual test circuits**  
Versatile, can test footwear or wrist straps
- **Positive rocker switch actuation**  
Reliably changes test mode
- **Redesigned test button**  
Rugged and reliable operation
- **LED's display test results**  
Simple operation with clear test results
- **Red light and audible alarm**  
Indicates that circuit resistance is too high or too low
- **Battery powered with low-battery indicator**  
Provides early warning to replace battery
- **Optional AC adapter**  
Versatile - can use line AC if preferred
- **Upgraded footplate**  
Molded bottom insulates and isolates wider, sturdier surface test area
- **Provided with calibration to NIST traceable standards; calibration unit available for users to maintain NIST calibration at their facility**  
Simple means to assure accurate performance Lower calibration life cycle costs
- **Made in America**

## Tests Both Wrist Straps and Foot Grounders

<b>P/N</b>	<b>Description</b>
<b>19250</b>	Combo Tester, 9 Volt Battery, NIST Calibrated
<b>19253</b>	Combo Tester with Footplate, NIST Calibrated
<b>19252</b>	Combo Tester with Stand, NIST Calibrated
<b>98273</b>	Footplate for Combo Tester (includes molded footplate and ground cord)
<b>98254</b>	Stand for Combo Tester (includes stainless steel stand and pedestal)
<b>98256</b>	AC Adapter, 120V

Wrist Strap Range: 750 Kilohms - 10 Megohms  
Footwear Range: 750 Kilohms - 100 Megohms

Per ESD Handbook TR 20.20 paragraph 5.3.2.4.4 "Typical test programs recommend that wrist straps that are used daily should be tested daily. However, if the products that are being produced are of such value that knowledge of a continuous, reliable ground is needed, and then continuous monitoring should be considered or even required." [Click here for more information on continuous monitoring.](#)
