

## Description

An extremely versatile range of rocker switch/thermal circuit breakers (S-type TO CBE to EN 60934 with trip free mechanism) offering the choice of single pole, double pole with single pole protection, and double pole with protection on both poles. Designed for snap-in panel mounting with versions available for three different panel cut-out sizes. Illumination is optional and there is a range of colours and markings for the rocker. Under overload conditions the rocker returns to the OFF position. 6-way frame for 3120-F5 available upon request.

Any one of the following additional function modules can be supplied factory fitted to the rear of the switch/circuit breaker.

- Under voltage release coil (for double pole versions only).
- Magnetic trip coil for short circuit protection.
- Magnetic trip coil for remote relay trip.
- Auxiliary contacts for status signalling.
- Mechanical slide interlock.

Approved to CBE standard EN 60934 (IEC 60934).

## Typical applications

Motors, transformers, solenoids, extra low voltage wiring systems, office machines, electro-medical equipment, power supplies, communications systems, medical equipment to EN 60601.

## Standard current ratings and typical internal resistance values

| Current rating (A) | Internal resistance per pole (Ω) | Current rating (A) | Internal resistance per pole (Ω) |
|--------------------|----------------------------------|--------------------|----------------------------------|
| 0.1                | 94                               | 3.5                | 0.0565                           |
| 0.2                | 24                               | 4                  | 0.0435                           |
| 0.3                | 12                               | 4.5                | 0.0435                           |

3120 - F 3 2 1 - N7 T1 - W 14 A B 4 - 10 A ordering example  
 3120 - F . 0 . - N7 Q1 - W .. . . - 20 A (switch only)

**N.B.**  
 Switch only versions must be specified with -N7 or -G7 terminals.  
 Terminals 12(k) and 22(k) are not fitted.

## Typical time/current characteristics

single or double pole load

0.1 ... 2 A

2.5 ... 20 A

The time/current characteristic curve depends on the ambient temperature prevailing. In order to eliminate nuisance tripping, please multiply the circuit breaker current ratings by the derating factor shown below. See also section 9 – Technical information.

|                        |     |      |      |      |       |      |      |      |
|------------------------|-----|------|------|------|-------|------|------|------|
| Ambient temperature °F | -22 | -4   | +14  | +32  | +73.4 | +104 | +122 | +140 |
| °C                     | -30 | -20  | -10  | 0    | +23   | +40  | +50  | +60  |
| Derating factor        | 0.8 | 0.76 | 0.84 | 0.92 | 1     | 1.08 | 1.16 | 1.24 |

## Internal connection diagrams

**2 pole, thermally protected on both poles**

**2 pole, thermally protected on one pole only**

**1 pole, thermally protected**

**2 pole, unprotected**

## Dimensions

**Style F3.1**

collar height 1 mm/.039 in.

Actuating force max. 35 N  
optional illumination in ON position

## Mounting style variants

**Style F 3.3 collar height 9 mm (.354 in.)**

**Style F 3.4**

collar height 2 mm (.079 in.), with water splash protection

**Style F 5.1**

**Style F 5.U**

with water splash protection (IP54) and actuator guard

Dimension diagram for style F6 is available on request.

## Installation drawing

This is a metric design and millimeter dimensions take precedence (mm/inch)

## Accessories

### Rear terminal shroud black (IP64) Y 304 275 01

### Water splash cover, transparent (IP66) for style -F5.. X 221 619 01

### 6-way frame for 3120-F5... upon request

### Insulated cover Y 303 068 01

### Terminal adapter Y 303 862 01

### Spacer for 3120-F3... Y 303 675 01/02

### Spacer for 3120-F5... Y 303 676 01

### Blanking piece in -F3 frame Y 303 885 31

## Cut-out dimensions

### Cut-out for mounting style -F3 with rocker and push button

### Cut-out for mounting style -F6 with rocker

### Cut-out for mounting style -F5 with rocker

Edges of working parts: ISO 13715

This is a metric design and millimeter dimensions take precedence (mm)  
inch

All dimensions without tolerances are for reference only. In the interest of improved design, performance and cost effectiveness the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.

## Description

E-T-A's proven type 3120 in a new attractive styling (S-type TO CBE to EN 60934 with trip free mechanism) offering the choice of single pole, double pole with single pole protection, and double pole with protection on both poles. Designed for snap-in panel mounting with illumination as an option. Under overload conditions the rocker returns to the OFF position.

Any one of the following additional function modules can be supplied factory fitted to the rear of the switch/circuit breaker.

- Under voltage release coil (for double pole versions only).
- Magnetic trip coil for short circuit protection.
- Magnetic trip coil for remote relay trip.
- Auxiliary contacts for status signalling.
- Mechanical slide interlock.

Approved to CBE standard EN 60934 (IEC 60934).

Available accessories: water splash protection and actuator guard to prevent inadvertent operation.

## Typical applications

Motors, transformers, solenoids, extra low voltage wiring systems, office machines, electro-medical equipment, power supplies, communications systems, boating.

## Standard current ratings and typical internal resistance values

| Current rating (A) | Internal resistance per pole (Ω) | Current rating (A) | Internal resistance per pole (Ω) |
|--------------------|----------------------------------|--------------------|----------------------------------|
| 0.1                | 94                               | 3.5                | 0.0565                           |
| 0.2                | 24                               | 4                  | 0.0435                           |
| 0.3                | 12                               | 4.5                | 0.0435                           |
| 0.4                | 5.30                             | 5                  | 0.0325                           |

**N.B.**  
Switch only versions must be specified with -N7 or -G7 terminals.  
Terminals 12(k) and 22(k) are not fitted.

## Typical time/current characteristics

single or double pole load

### 0.1 ... 2 A

### 2.5 ... 20 A

The time/current characteristic curve depends on the ambient temperature prevailing. In order to eliminate nuisance tripping, please multiply the circuit breaker current ratings by the derating factor shown below. See also section 9 - Technical information.

|                        |     |      |      |      |       |      |      |      |

All dimensions without tolerances are for reference only. In the interest of improved design, performance and cost effectiveness the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.

## Description

Switch/thermal trip free circuit breaker (S-type TO CBE to EN 60934) with standard isolator style two button operation. Single button press-to-reset version also available. Both types can be supplied in single pole configuration only, in double pole with single pole protection, and in double pole with protection on both poles. Designed for snap-in panel mounting. There is a choice of push button colour combinations and illumination is optional.

Any one of the following additional function modules can be supplied factory fitted to the rear of the switch/circuit breaker:

- Under voltage release coil (for double pole versions only).
- Magnetic trip coil for short circuit protection.
- Magnetic trip coil for remote relay trip.
- Auxiliary contacts for status signalling.
- Mechanical slide interlock.

Approved to CBE standard EN 60934 (IEC 60934).

## Typical applications

Motors, transformers, solenoids, extra low voltage wiring systems, office machines, electro-medical equipment, power supplies, communications systems, industrial controls.

## Standard current ratings and typical internal resistance values

| Current rating (A) | Internal resistance per pole (Ω) | Current rating (A) | Internal resistance per pole (Ω) |
|--------------------|----------------------------------|--------------------|----------------------------------|
| 0.1                | 94                               | 3.5                | 0.0565                           |
| 0.2                | 24                               | 4                  | 0.0435                           |
| 0.3                | 12                               | 4.5                | 0.0435                           |

Terminals 12(k) and 22 (k) are not fitted.

## Typical time/current characteristics

single or double pole load

**0.1 ... 2 A**

**2.5 ... 20 A**

The time/current characteristic curve depends on the ambient temperature prevailing. In order to eliminate nuisance tripping, please multiply the circuit breaker current ratings by the derating factor shown below. See also section 9 – Technical information.

## Description

A module supplied factory fitted to type 3120-F to provide electrically separate changeover contacts which operate as the main contacts open/close. Ideally suited to status signalling and sequence switching.

## Typical applications

Monitoring of the switching position of the circuit breaker or any connected load.

| Mass  | approx. 38 g (complete assembly)  |

## Description

A module suitable for all double pole versions of type 3120-F to trip the main switch/circuit breaker mechanism in the event of loss of voltage. When the voltage is restored the rocker switch must be reset to reconnect the load, thereby avoiding the safety hazards associated with automatic re-starting of machinery.

**Note:** Basic unit 3120-...-H7 or -G7: screw terminals necessary.

## Typical applications

Machines such as power tools, industrial equipment and domestic appliances where automatic restart after restoration of power could be dangerous (EC Machinery Directive)

## Description

A module which adds remote trip capability to all versions of type 3120-F. A voltage applied across the coil, by means of an external sensor for example, will cause disconnection of the main switch/circuit breaker mechanism.

## Typical applications

Electrical monitoring of safety systems, remote trip.

## Description

Suitable for use with all type 3120-F versions, this module provides a mechanical safety interlock which, according to the option specified, prevents the main switch/circuit breaker mechanism from being reset/switched on. The actuator is intended for use with interlock systems to ensure that machinery cannot be operated without covers and safety guards in place, for instance.

## Dimensions

## Typical applications

Mechanical monitoring of safety systems, e. g. for garden shredders.
