

EECO's 1400 series switches feature snap-in front mounting in a large, easy to use package size. These switches snap together, allowing the user to create multiswitch assemblies quickly and easily without the need for additional hardware. The 1400 series offers a choice of thumbwheel, push-set or lock-set actuator methods. The lock-set model eliminates the possibility of accidental setting changes in critical applications. The 1400 series offers several 10 and 16 position binary and decimal output codes. Options such as diode provision termination, stops and Fpins for P.C. board mounting make the 1400 series switch a popular choice among design engineers. The 1400 series is covered by EECO's one year warranty.

NOTE: 1300 Series pushwheel switch discontinued, 1400 series is suggested replacement.

## 1776/1976 Series

EECO's 1776 and 1976 thumbwheel switches are the standards of the industry. Both series offer $8,10,12$ or 16 position binary or decimal codes for every possible application. The 1776 series switch is $.500^{\prime \prime}$ wide, while the 1976 is .350 " wide to save valuable front panel space.
Optional notched terminals allow motherboards be easily attached. The list of available options also includes custom legends, lighting

options, double wide message units and fast mount installation hardware. Many switch models offer diode provision or several optional P.C. board configurations, allowing the switch outputs to be bussed together. The 1776 and 1976 both offer proven reliability at a reasonable price, and are backed by EECO's one year warranty.

## 1800 Series

The 1800 series thumbwheel switch features large, easy to read characters and a small price. The 1800 series design includes front snap-in mounting, and is a slim . $315^{\prime \prime}$ ( 8 MM ) wide to conserve front panel space. The 1800 is offered in the most popular decimal and binary output codes to meet the requirements of almost any design. Other options include stop pins and provision for diode diode installation. termination. The 1800 series is covered by EECO's one year warranty.

## 2000 Series

## E

EECO's 1776 and 1976 Series thumbwheel switches are the standards of the industry. Both Series offer 8, 10, 12 or 16 position binary or decimal output codes for every possible application.
The 1776 Series is a standard .500 " wide, while the 1976 Series is .350" wide to save valuable front panel space. Optional notched terminals allow motherboards to be easily attached. The list of available options includes custom legends, lighting options, doublewide message units and fast-mount installation hardware. Many switch models offer mounting provisions for diodes. The 1776 and 1976 Series both offer proven reliability at an economical price, and both are backed by EECO's one-year warranty.

## SPECIFICATIONS

## MECHANICAL

| No. of Switching Positions | Minimum 1,000,000 Detents @ $10 \mathrm{~mA}, 5 \mathrm{VDC}, 12,165^{\circ} \mathrm{C}$ |
| :--- | ---: |
| Life | 1776 Series: $6-18 \mathrm{Oz} ., 1976 \mathrm{Series} 5-16 \mathrm{Oz}$. |
| Tangential Operating Force | 0.35 Oz. |
| Weight |  |

ELECTRICAL

| Maximum Electrical Current, Non-Switching | 3A Per Common Terminal |
| :--- | ---: |
| Maximum Rated Load, Switching | 125 mA at 28 VDC or 115 VAC |
| Contact Resistance (Initial) | $100 \mathrm{~m} \Omega$ Maximum |
| (After Life) | $200 \mathrm{~m} \Omega$ Maximum |
| Insulation Resistance | $1,000 \mathrm{M} \Omega$ Minimum At 100 VDC |
| Dielectric Withstanding Voltage | 1000 VAC (RMS) Single Pole Models |

## ENVIRONMENTAL

| Operating Temperature | $-20^{\circ} \mathrm{C} \mathrm{To}+75^{\circ} \mathrm{C}$ |
| :--- | ---: |
| Storage Temperature | $-40^{\circ} \mathrm{C} \mathrm{To}+100^{\circ} \mathrm{C}$ |
| Seal | Dust Resistant |

MATERIALS

| Plastic | Polycarbonate per Federal Spec LP-393A |
| :--- | ---: |
| Metals | Corrosion Resistant |
| Circuit Disc - Material | Glass Epoxy |
| Plating | Gold Over Nickel Plating |
| Terminals | Copper Alloy, Plated for Soldering |
| Contacts | Copper Alloy, Gold Over Nickel Plating |

RoHS COMPLIANCE
EECO Switch is fully committed to complying with the European Lead-Free and RoHS directives. The 1776 and 1976 series are Lead Free and RoHS compliant.

Assembly dimensions may exhibit expansion of 0.003" per station before installation, but will adjust to recommended panel dimensions shown once installed. Subtract 0.250 " from each dimension shown for each S76SG spacer included in the assembly. Add 0.500 " to each dimension per switch for assemblies over 10 stations.
Tolerances $. X X X \pm 0.010 ", . X X \pm 0.030$. Metric equivalents shown in ().

| AVAILABLE OPTIONS |  |
| :--- | :--- |
| A | Diodes Installed Anode To Common |
| C | Diodes Installed Cathode To Common |
| D | Decimal Point |
| G | Gloss Finish (Standard) |
| K | Lighted Decimal Point |
| L | Lighted Switch Legend, black hot-stamped character on white translucent background. 5 Volt |
| M | lamp standard, consult factory for other voltages |
| N | Notched Terminals - Required to attach PC boards. Also accepts soldered cable connection |
| P | +/-Rotor Marking |
| R | Reverse Lighting - Illuminated white character on black background |
| T | Alphabet Marking |
| U | EMI/RFI Shielding |
| Y | Fast Mount Hardware (applies to assembly part number) |
|  | Stop Pins |
|  | Consult Factory for Custom Rotor Marking, Double-Wide Switch Modules, Custom Output Codes |
| and Other Special Requests |  |

ORDERING EXAMPLE - SWITCH

## ORDERING EXAMPLE - SWITCH ASSEMBLY

Assemblies of mixed switches and/or certain options require a special assembly number. Consult factory for additional ordering information.
