

## Item # PT15B2 Rectangular

**Rectangular**

- Sparks once per rev
- Large 7 segment LCD display
- Low cost and small size
- No power required
- Solid state electronics
- Quartz crystal
- Wide operating temperature range
- High reliability
- Indicates operation in RPMs and hours
- Factory set 1, 2, 4, cycle engine, or hour meter only
- Easy to install.
- Made in the U.S.A.

ENM is proud to present the new series PT15 self-powered digital tach/maintenance/hour meter. The PT15 keeps track of true engine RPM and running time for all types of gasoline engines. The unit is powered by an internal lithium battery. No external power connections are required. The Operation of the tach/hour meter is triggered by 5.5 ft. shielded and external lead, wrapped around the spark plug wire of the engine since the unit is triggered by the spark of the engine, the hours and the RPM display actual operation. This is useful for maintenance and warranty applications for any type of engine powered machinery.

**Specifications**

<b>Operating Battery Life</b>	Internal lithium battery 35,000 hours continuous running. Internal Lithium Battery 8 years plus non-replaceable
<b>Operating Temperature</b>	Standard: -10 to +60 °C
<b>Vibration resistance @ 1 to 8 Gs.</b>	Withstands 10 to 75 Hz
<b>Wire Length</b>	3.5 ft.
<b>Compatibility</b>	sparks once/rev

## Self Powered Engine Digital Tach/ Hour Meter, Series PT15

PT15

### Features

- Large 7 segment LCD display
- Low cost and small size
- No Power required
- Solid state electronics
- Quartz Crystal
- Wide operating temperature range
- High reliability
- Indicates operation in RPMs and Hours
- 1, 2, 4, Cycle engine or Hour Meter only
- Easy to install
- ISO 9001:2000 Certified
- Made in the U.S.A.

ENM is proud to present the new series PT15 self-powered Digital Tach/Hour meter. The PT15 keeps track of true engine RPM and running time for all types of gasoline engines. The unit is powered by an internal lithium battery. No external power connections are required.

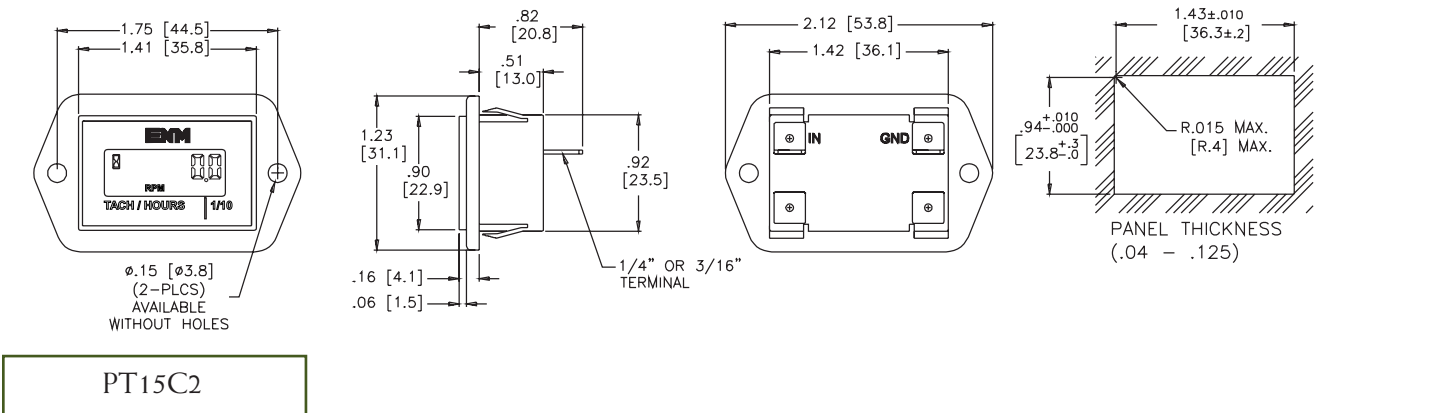

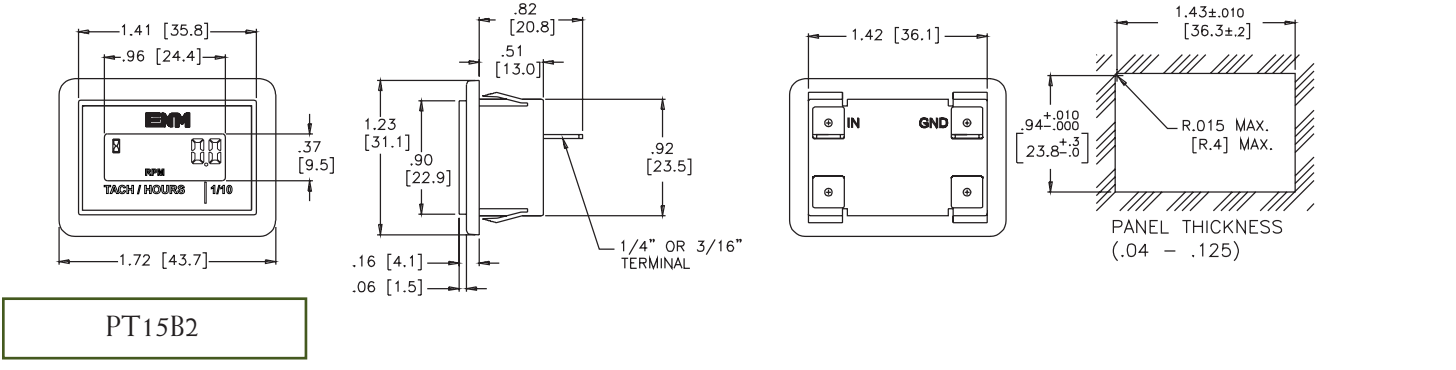

The operation of the Tach/Hour meter is triggered by external lead wire, wrapped around the spark plug wire of the engine. Since the unit is triggered by the spark of the engine, the hours and the RPM display actual operation. This is useful for maintenance and warranty applications for any type of engine-powered machinery.

The RPM is displayed when the engine is running. Hour usage is displayed when the engine is off and remains visible.

With solid state technology the PT15 series is built with a custom chip and with solid construction for maximum durability in harsh environments and rugged application.

### Specifications

Capacity:	9999.9 Hours Meter 01=13,000 RPM 02=24,000 RPM 03=48,000 RPM
Sampling Time:	1-Second Approximate
Character height:	Large 5 mm digits.
Operating battery life:	8 year Internal Lithium Battery
Operating temperature:	Standard -10C to +85C
Vibration resistance:	Withstands 10 to 75 Hz. at 1 to 8 G's.
Rpm Resolution:	10 Rpm
Configuration:	Round SAE Bezel with push on retaining chip. Other mounting styles are also available. See reverse side.
