Description

Hobbs produced the first halogen sealed beams for agricultural use in the early 1980s and has manufactured more than 25 million incandescent and halogen lamps for use in some of the most rugged working environments imaginable. Because they are designed for use in heavy construction and farming equipment, they are also designed to take shock, vibration, and other extreme service conditions in stride. A wide variety of types and sizes, with a complete selection of beam patterns and mounting configurations are available to suit almost any off-road application.

The Hobbs product line includes halogen sealed beams, composites, custom designer lights, specialty lighting and indicator modules for vehicular and non-vehicular applications.
