#### 331

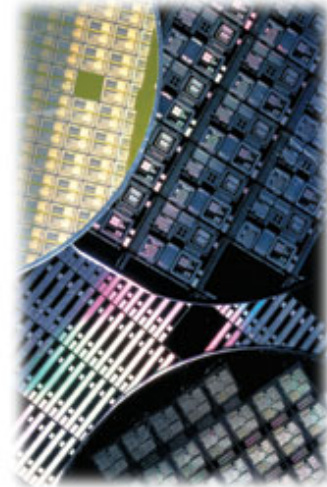

Kester "331" Organic Flux is a water soluble formula for use in flux-cored solder wire. This cored solder version of the popular #2331 Neutral Organic Water Soluble Liquid Flux is more effective than rosin fluxes in soldering difficult metals. The same fast action and mild properties are exhibited with "331" Organic Flux as with the liquid #2331. The flux is more heat stable than most organic fluxes, resulting in minimal smoke and odor. The residue can be completely removed with a simple water rinse.
