

Part Number: **MIN010**

Technology: **Fuses**

Series: **297**

297 Series - MINI® Fast-Acting Automotive Blade Fuse

The MINI® Fuse is quickly becoming the new standard for vehicle circuit protection throughout the world. Its miniature design, patented by Littelfuse, meets the need for more circuits to be protected while utilizing less space, and its ability to cope with high temperatures in adverse environments makes the MINI® Fuse the recommended choice for protection.

Electrical Characteristics

Property	Value
Amps (A)	10
Characteristics	Fast-Acting
Color	Red
I^2t (A ² Sec) Minimum	93
Resistance (Ohms)	0.0073
VDC	32
Voltage Drop	108

ATO® (Autofuse®) Blade Fuse

Patented and introduced in 1976 by Littelfuse, it became the international fuse standard by 1981. It is currently found on most cars, trucks, buses and off road vehicles worldwide. Features Littelfuse designed industry standard color coding to indicate amp rating.

Voltage Rating Characteristics: 32V AC/DC Fast-Acting
Approvals: UL listed, CSA certified 3-30A, SAE J1284.

MINI® Blade Fuse

Patented and introduced in 1989 by Littelfuse to meet the OEM need to protect a greater number of circuits without utilizing more space. Features silver plated blades and Littelfuse designed industry standard color coding to indicate amp rating.

Voltage Rating Characteristics: 32V AC/DC Fast-Acting
Approvals: SAE J2077.

MAXI™ Blade Fuse

MAXI Fuses are primarily used for under hood applications and are produced with a high temperature polymer and silver plated blades. They replace the commonly used fusible wire or fusible link to protect a high current segment or system of the wiring harness. Features Littelfuse designed industry standard color coding to indicate amp rating.

Voltage Rating Characteristics: 32V AC/DC Slo-Blo
Approvals: SAE J1888.
