

Microfiber Super Cloth

8281 **NEW**

This revolutionary microfiber cloth effectively removes dust, lint, oils, and other liquids easily. It is lint free, streak free and soft enough for all electronics or screens.

Typical application: Cleaning and dusting monitors, keyboards, desktops, telephones, printers, work benches, or as an effective hand cloth for drying off oils or liquids.

Microfiber is fiber with strands less than one [denier](#). Microfiber is the perfect blend of polyester and polyamide. Fabrics made with microfibers are exceptionally soft and hold their shape well. When high quality Microfiber is combined with the right knitting process, it creates an extremely effective cleaning material. This material can hold up to seven times its weight in water. They are also used for some cleaning applications, because of their exceptional ability to absorb oils.
