# IS18WWC1W

DISTINCTIVE CHARACTERISTICS

- Organic LED technology in display rocker (patent pending)
- Multifunction programmable device: select with rocker, push for activation
- Replaces multiple switches and displays with one device in a small package
- Broad display aids in navigation, both forward and reverse and up and down, in structured menus
- Wide viewing angle of 180° and large 0.92" display with exceptional contrast
- Conforms to IP64 of IEC60529 Standards on panel surface; dust tight construction of switch prevents entry of dust and improves contact reliability
- Commands and data supplied via serial communications protocol (SPI)
- Long life OLED with 52,000 hours at 30% illumination
- High reliability and long mechanical and electrical life of one million actuations minimum
- Stylish black housing design with matte finish complements any application

Monochrome OLED featuring sharp contrast and high resolution with 96 x 64 pixels

Panel mount with easy, snap-in installation

Short 14.6mm (.575") behind-panel height for compact spaces

Connector socket for simple connection available (AT715)

Actual Size

OLED SMARTSWITCH™ Rocker

SMARTSWITCH PART NUMBER & DESCRIPTION

Part Number	Switch Description	OLED	Pixel Format
IS18WWC1W	SP3T Rocker (ON) OFF (ON) Pushbutton Normally OFF	Single Color OLED Display Module White Indication Color	96 x 64 Pixels Horizontal x Vertical

SWITCH SPECIFICATIONS

Circuit	Single Pole Three Throw (Momentary)

Contact Position	Rocker Down	Pushbutton Normal	Pushbutton Down	Rocker Up
	(ON) 9-12	OFF	(ON) 10-12	(ON) 11-12

Electrical Capacity (Resistive Load)	3VA maximum DC
Contact Resistance	200 milliohms maximum
Insulation Resistance	500 megohms minimum @ 250V DC
Dielectric Strength	250V AC for 1 minute minimum
Electrostatic Resisting Pressure	15kV minimum
Mechanical Endurance	1,000,000 operations minimum
Electrical Endurance	1,000,000 operations minimum
Operating Force	6.0 Newtons at center of cap
Total Travel	1.4mm (.055") at center of cap

OLED SPECIFICATIONS

Characteristics of Display

Display Device	Single color OLED display
Display Mode	Passive matrix
Pixel Format	96 x 64 pixels (horizontal x vertical)
Pixel Size	0.16mm x 0.177mm (horizontal x vertical)
Interface	Serial (SPI) interface
Indication Color	White/Black (normally White)
Water, Dust Proof	Conforms to IP64 of IEC60529 standards on panel surface
Operating Temperature Range	−20°C ~ +70°C (−4°F ~ +158°F)
Storage Temperature Range	−25°C ~ +80°C (−13°F ~ +176°F)
Operating Life Time (Display)	52,000 hours (30% brightness); 15,600 hours (100% brightness)

Absolute Maximum Ratings (Temperature at 25°C)

Items	Symbols	Ratings
Supply Voltage for Logic/Interface	VDDA	−0.3V to +3.6V
Supply Voltage for Drive	VAH	−0.3V to +18.0V
Input Voltage	Vin	−0.3V to VDDA +0.3V

Current Consumption
(Temperature at 25°C, VDDA = 2.8V, VAH = 15.0V)

Items	Symbols	Min	Typical	Max
All-Pixels-On Mode *Drive System Power Current	I_{H1}	—	11.0mA	13.2mA
All-Pixels-On Mode *Logic/IF System Power Current	I_{DD1}	—	0.58mA	0.72mA
Sleep Mode **Drive System Power Current	I_{H2}	—	—	10µA
Sleep Mode **Logic/IF System Power Current	I_{DD2}	—	—	10µA

* All pixels shall be turned on with the maximum level gray scale
** All pixels shall be turned off (while chip is operating)

Recommended Operating Conditions

Items	Symbols	Minimum	Typical	Maximum
Supply Voltage for Logic/Interface	VDDA	2.7V	2.8V	2.9V
Supply Voltage for Drive	VAH	14.5V	15.0V	15.5V
Input High Level Voltage	V_{IH}	0.75 x VDDA	—	VDDA
Input Low Level Voltage	V_{IL}	0.0	—	0.25V x VDDA

Optical Characteristics
(Temperature at 25°C, Initial Value: depends on initial setting)

Items		Minimum	Typical	Maximum
Brightness		75 cd/m²	100 cd/m²	125 cd/m²
Chromaticity	(x)	*1	0.310	*1
	(y)	*1	0.320	*1
Contrast Ratio		100	—	—

* Chromaticity range is the area of the ellipse. (See Chromaticity Diagram next page.) The ellipse passes through points A, B, C and D and designates the center of each side of the quadrangle.

Chromaticity Diagram

Point	Chromaticity X	Chromaticity Y
A	0.3441	0.3663
B	0.2983	0.3384
C	0.2799	0.2881
D	0.3257	0.3160
TIMING SPECIFICATIONS

AC Characteristics
(Temperature at −20°C ~ +70°C), VDDA = 2.8V, VAH = 16V

| Items	Symbols	Minimum	Typical	Maximum
Clock Cycle Time	t_{cycle}	100ns	—	—
A0 Setup Time	t_{SWDS}	65ns	—	—
A0 Hold Time	t_{SWDN}	35ns	—	—
$\overline{XCS}$ Setup Time	t_{CWS}	65ns	—	—
$\overline{XCS}$ Hold Time	t_{CWH}	95ns	—	—
High Level $\overline{XCS}$ Pulse Width	t_{CSBH}	*10ns	—	—
Write Data Setup Time	t_{WDTS}	10ns	—	—
Write Data Hold Time	t_{WDTH}	20ns	—	—
SCL Low Time	t_{SCLL}	45ns	—	—
SCL High Time	t_{SCLH}	45ns	—	—
SCL Rise Time	t_r	—	—	15ns
SCL Fall Time	t_f	—	—	15ns

* Requires more than 100ns after resetting software
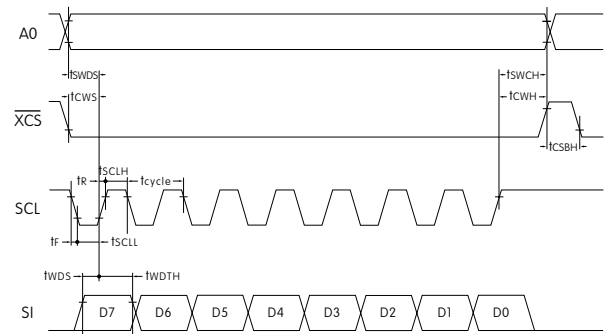

BLOCK DIAGRAM & PIN CONFIGURATIONS

IS18WWC1W
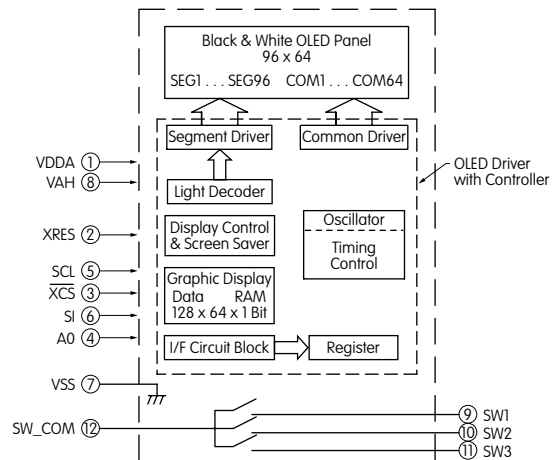

Pin No.	Symbol	Name	Function
1	VDDA	Logic Type Power Source	
2	XRES	Reset	Terminal to initialize IC built-in logic; initializes with low level
3	$\overline{XCS}$	Chip Select	Slave select for SPI. This line is active low
4	A0	Address	Terminal to input control signals of command/parameter. Set low at time of command input and high level at the time of parameter input
5	SCL	Serial Clock	Read command/parameter at time of SCL signal standing up
6	SI	Serial Data Input	Terminal to input command/parameter by SPI
7	VSS	Ground	
8	VAH	Drive Type Power Source	
9	SW1	Switch Terminal 1	N/O
10	SW2	Switch Terminal 2	N/O
11	SW3	Switch Terminal 3	N/O
12	SW_COM	Switch Common Terminal

Development Tools

NKK Switches offers a variety of development tools.
These tools include software that may be downloaded from **www.nkksmartswitch.com**.

In addition to standard configurations, NKK can provide custom solutions for the most complex design challenges. Contact the factory for information and support regarding your custom applications.

Development Kits provide a full set of tools for designs. The Dev Kits enable rapid prototype designs so that feedback is easily obtained. NKK's IS Development Kits have been designed to facilitate the creation, testing and displaying of images with software downloaded from **www.nkksmartswitch.com**. Click on "Download Software."

PRECAUTIONS FOR HANDLING & STORAGE

Handling

ATTENTION
ELECTROSTATIC
SENSITIVE DEVICES

1. The IS Series OLED devices are electrostatic sensitive.

2. Signal input under conditions not recommended may cause damage to the OLED unit or deterioration of the display. Follow directions regarding supply sequences of power and signal voltages.

3. If the OLED panel is broken, avoid touching the contents. Wash off any contact to the skin or clothing.

4. Limit operating force to 100.0N maximum, as excessive pressure may damage the OLED.

5. Under certain actuation conditions, one side of the rocker and the center switch can both send actuation signals.

6. Pixels acquire diminished brightness over time and use, and those most frequently habituated have greater reduction of brightness than those less used. To minimize this difference, operate OLED unit so that all pixels are used as consistently as possible.

7. Clean actuator surface with dry cloth. If further cleaning is needed, wipe with dampened cloth using neutral cleanser and dry with clean cloth. Do not use organic solvent.

Storage

1. Store in original container and away from direct sunlight.

2. Keep away from static electricity.

3. Avoid extreme temperatures, high humidity, gaseous substances, and all forms of chemical contamination.

Panel Mounting

Incorrect → Correct

Gasket position must be even with no gaps beneath bezel   Gasket secure and flush against bezel

- Before snapping a switch into the panel, align the gasket evenly under the bezel of the switch.

- When mounting into a panel, apply equal pressure to sides of bezel and insert parallel to the panel.

- After mounting a switch, be sure there are no gaps between switch and panel. Lightly push into panel.

- After installing into panel, do not apply excessive force.

- After panel installation and wiring is completed, do not apply force horizontally or vertically from behind panel.

- Behind the panel, cut area should be squared. If front of panel is painted, do not allow any paint to collect in corners of cutout to prevent level mounting.

Clean Edges

- Avoid reinstalling a switch once it has been mounted into panel. This may cause deterioration of panel sealability.
