- Note:**
- To meet UL listing requirements with the H7CX-A11□ models, an OMRON P2CF-11-□ or P3GA-11 Socket must be mounted on the H7CX. Otherwise, H7CX-A11□ models are considered to meet UL508 recognition requirements.
  - The Y92S-29 Waterproof Packing and Y92F-30 Flush Mounting Adapter are necessary to ensure IP66, NEMA4, and UL Type 4X waterproofing between the H7CX and installation panel.

### Panel Cutouts

Panel cutouts are as shown below.  
(according to DIN43700).

- Note:**
1. The mounting panel thickness should be 1 to 5 mm.
  2. To allow easier operability, it is recommended that Adapters are mounted so that the gap between sides with hooks is at least 15 mm (i.e., so that the panel cutout interval is at least 60 mm).
  3. It is possible to mount counters side by side, but only in the direction without the hooks.  
If they are mounted side-by-side, water-resistant specifications cannot be ensured.
