

Ultra-slim Photoelectric Sensor

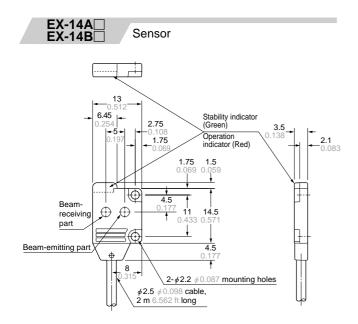

The EX-10 series is one of the smallest sensors on the market today. The ultra small size allows for mounting in the smallest areas.

The size is achieved by locating all of the electronics and controls in an in-line amplifier. A bright 2-color indicator on the sensor head allows for quick determination of the sensor state. The EX-10 series is also equipped with a 0.5ms response time for high-speed detection and an IP-67 rated housing for wash-down environments. The mounting options available include a front sensing type as well as a side sensing type. Each type has two, metal reinforced M3 mounting holes for stable sensor placement. All types are available as either Light ON or Dark ON and PNP or NPN.

- Notes: 1) Model Nos. having the suffix '-PN' are PNP output type.

 2) Either Light-ON or Dark-ON can be selected by the operation mode switch (located on the bifurcation).

 3) The sensing range of convergent reflective type sensor is specified for white non-glossy paper (50 × 50 mm 1.969 × 1.969 in) as the object.

 4) The flexible cable type (model Nos. having suffix '-R') has a 0.1 mm² 3-core (thru-beam type emitter: 2-core) flexible cabtyre cable, 2 m 6.562 ft long.
