Plug-in type control unit SF-C11

Quick-connection

Connecting to the light curtain is done using plug-in connections, which shortens setup and replacement time.

Easy setup requiring no torque control

A spring method is used for the terminal blocks for connections other than to the light curtain. There is no need to control tightening torques for these terminal blocks.

Removable terminal blocks reduce maintenance time

Removable terminal blocks are used. This reduces the work required for reconnecting wiring during maintenance.

Robust type control unit SF-C12

Metal enclosure with a IP65 protective structure **Robust**

The strong metal enclosure has a built-in safety relay. It has an IP65 protective structure, so that it can be set up individually without needing to be inserted into a control panel.

Slim type control unit SF-C13

Slim design **Slim**

22.5 mm 0.886 in thickness, so can be inserted even into narrow spaces inside panels.
