

ABMQS-A-Q

- Multiple cable tie bridges on one mount speeds installation of cable bundles by reducing the number of mounts applied
- The Dovetail connection system provides alignment and a joining method to expand routing capabilities
- The V-groove allows for easy separation into two mounts with two bridges each for separate applications
- 4-way cable tie bridges allow cable bundles to be secured perpendicular to the mount for even spacing or inline to secure a bundle in multiple places
- The large adhesive surface area provides long-term reliability and keeps product in place despite heavy load or high stress
