## 3M™ Vetrap™ Bandaging Tape

Vetrap bandage, the first name in flexible wrap, has become known around the world as the preferred bandaging tape.

Vetrap bandage...

- Is strong
- Provides support
- Applies pressure to inhibit bleeding, yet is flexible enough that when used properly with padding it will not cut off circulation
- Adheres to itself so no clips or fasteners are needed to secure the end of the wrap
- Will absorb virtually no moisture
- Cool, lightweight and virtually nonirritating

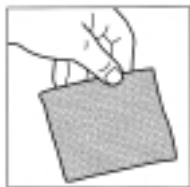

### *Bovine Hoof Care*

Vetrap bandages are an effective aid in treating hoof problems – they provide durable protection following treatment of hoof ailments such as hoof rot, subsolar abscesses, laminitis, sole bruises, sole erosions, nonhealing ulcers, sand cracks, heal cracks, digital dermatitis (hairy warts), and interdigital corns (Fibromas).

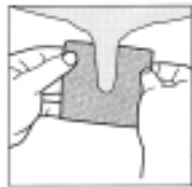

### *Teat Taping*

Vetrap bandages have proven effective in teat taping – we recommend using white Vetrap tape for this procedure.

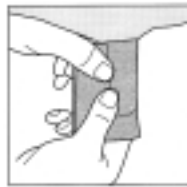

### *Teat Taping Technique:*

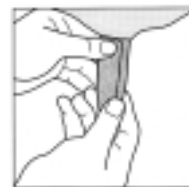

1.  
Cut a piece of white 4" Vetrap tape approximately 10-11" long. Fold the tape over lengthwise to make a bandage about 5" long.

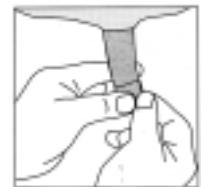

2.  
Place the Vetrap tape behind the teat you are bandaging, making sure the stretch will be applied horizontally.

3.  
Bring the two ends of the bandage together, pinching the tape close to the teat with your fingers and thumbs to achieve adequate tension. Sufficient tension must be used to keep the tape on the teat.

4.  
Fold the tab created in illustration #3 around the teat, using no tension.

5.  
Fold up the tab created at the bottom of the bandage.

### 3M™ Micropore™ Surgical Tape

Micropore tape, a very porous, gentle and conformable tape for fragile skin is excellent for taping leakers.

### 3M™ No Sting Barrier Film

3M No Sting film, an alcohol free sterile product, forms a transparent, protective film on the skin. It is useful for lesions and open sores on legs, teats and udders.

## Safety Products

### Respirator Solutions

3M offers a variety of safety products for the agricultural workplace. Whether you require protection from dust and particles, toxic particles, vapors, or welding fumes, 3M can offer a proven respiratory solution.

3M™ 8210 N95 Particulate Respirator

3M™ 8212 N95 Particulate Respirator

3M™ 8247 R95 Particulate Respirator

3M™ 8511 N95 Particulate Respirator

*See warnings for use on back page.\**

## 3M™ Hearing Protection Products (exceed 85 decibels)

Proper hearing protection is important when operating field equipment such as tractors, choppers and blowers. Protection should also be used when handling grain, around small engine and shop equipment and when in swine confinement facilities.

1100 Expandable Foam Ear Plug

1110 Corded Expandable Foam Ear Plus

1440 Ear Muff

## Slip Protection

For slip protection in milk parlors, equipment platforms and steps and walkways, use 3M™ Black Outdoor Safety Walk™ Tread.
