Features and benefits

- FN 356 represents the industry standard filter solutions for EMC compliance on three-phases and the neutral conductor, providing high attenuation of both symmetrical and asymmetrical interference.
- Choice of connection style is offered for an application-specific filter selection.
- Solid touch-safe terminal blocks (-29, -35, -34 versions) offer a generous contacting cross section and contribute to overall safety (IP20).
- Used as a mains input filter, FN 356 filters increase the conducted immunity and thus contribute to system reliability.
- Design compliance with IEC 60950 provides additional application flexibility.

Typical applications

- General purpose four-wire filtering
- Mainframe computer systems
- High power office equipment
- UPS
- Installations comprising automation equipment

** Maximum leakage under normal operating conditions, based on the assumption that all three phases and the neutral conductor are connected to the supply and the consumer. In this case, the current will mainly return through the neutral line, not as earth leakage.

Typical filter attenuation

Per CISPR 17; A = 50Ω/50Ω sym; B = 50Ω/50Ω asym; C = 0.1Ω/100Ω sym; D = 100Ω/0.1Ω sym
