

WD2000M | 2-80 Watt outputs

The WD2000M allows simultaneous use of both the WMRP micro soldering pencil and the new WMRT micro desoldering tweezers. An ideal package for reworking small component circuit boards.

Silver buttons on the front panel indicate compatibility with silver soldering pencil (WMRP) and rework tweezers (WMRT).

Both micro-sized handpieces have extremely short heat-up time and optimum heat transfer capability.

WMRTH | featuring Stop+Go

When you place the WMRT tweezers in the WMRTH Stop+Go rest, the unit is switched off to extend tip life. When you remove the tweezers from the stand, you can begin working again almost immediately due to the super-fast heat-up.

See page 8 for features on the WMRP soldering pencil and the WMRT Micro desoldering tweezers

Dual Outputs

The WD200M control unit has dual outputs. Two-channels will run up to two 80 watt tools simultaneously.

WMRT Desoldering Tweezers

Quickly and easily desolders SMD chip packages as small as 0201.

Stop and Go Tool Rest

The built-in Stop+Go function in the safety rest reduces the temperature of the tips when the tweezers are inserted.
