## 

## Power Transformer

PC Mount: Flat Pack ${ }^{\text {тм }}$

## FP230-25

## Electrical Specifications (@25C)

1. Maximum Power: 6.0 VA
2. Primary Voltage:

Series: 230V@50/60 Hz
Parallel: 115V@50/60Hz
3. Secondary:

Series: 230.0VCT @ 0.025Amps
Parallel: 120.0V @ 0.050Amps

## Description:

The FP230-25 is part of a series which has a long history of reliable service in the field, made from a proven design and constructed with UL recognized materials.

## Construction:

Wound on two dual channel nylon bobbin. Materials are UL recognized, Class B ( $130^{\circ} \mathrm{C}$ ) rated.

## Safety:

These products are $100 \%$ hipot tested with an insulation of 2000 V between primary and secondary windings and 1500 V between the primary / secondary windings and the core.

## Agency File:

UL: File E53148, UL 506, Class B General Purpose Transformer,
cUL: File E53148, UL 506, Class B General Purpose Transformer, Canadian Use

## MI cris

Dimensions:

Units: In inches
Weight: 7.0 oz
Pin Dimension: . $020 \times .041$ in

RoHS Compliance: As of manufacturing date February 2005, all standard products meet the requirements of 2002/95/EC, known as the RoHS initiative.

:: FI a t Pack
:: Description
The Triad Flat pack power transformer is designed to meet the needs of lower clearance PC board and solid state power designs. These units can also be used for control and instrumentation applications. Voltages and currents were chosen for widely used power applications. It is offered in a dual primary and dual secondary configuration.

## :: Specifications

Primary: $115 / 230 \mathrm{~V}, 50 / 60 \mathrm{~Hz} \mid$ Hi Pot Tested: 2,000 VRMS | Low Profile: Allows 3/4" card spacing for 2.5 VA units; Allows 1" card spacing for 6 VA units; Allows $11 / 4$ " card spacing for 12 VA units: Allows $11 / 2$ " card spacing for 24 VA and 48 VA units.

[^0]
## Technical Notes

1. Hi-pot tested at 2,000 VRMS
2. Split bobbin with side-by-side windings to reduce capacitance and eliminate the need for a static shield.
